DETAILED ACTION

Applicant's arguments, see pages 7-8, filed on 4/10/2008, with respect to claims 1, 4, 6-10, 13 and 15-20 have been fully considered and are persuasive. The rejections of claims 1, 4, 6-10, 13 and 15-20 have been withdrawn.

Allowable Subject Matter

Claims 1, 4, 6-10, 13 and 15-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claims 1, 4, 6-9 and 19**, independent claim 1 discloses a control method for controlling an image pickup apparatus in an image delivery system that delivers images acquired from the image pickup apparatus to at least one of external devices, the image pickup apparatus being remotely controllable by the external devices, the method comprising controlling the image pickup apparatus based on a schedule which includes a set of control data to control the image pickup apparatus and a priority level of the schedule; ***comparing, in a case where a request for remotely controlling the image pickup apparatus is received from one of the external devices when the image pickup apparatus is controlled based on the schedule, a priority level of the requesting external device with the priority level of the schedule including the set of control data used at the time when the request is received; inhibiting remote control of the image pickup apparatus by the requesting external device if the priority level of the schedule is higher than the priority level of the requesting external device as a comparison result; and***

allowing the requesting external device to control the image pickup apparatus if the priority level of the schedule is lower than the priority level of the requesting external device as a comparison result, which is neither taught or an obvious variation of the relevant prior art.

Regarding **claims 10, 13, 15-18 and 20**, independent claim 10 discloses an image delivery apparatus that delivers images acquired from an image pickup apparatus to at least one of external devices, the image pickup apparatus being remotely controllable by the external devices, the image delivery apparatus comprising: a data storage medium that stores a schedule which includes a set of control data to control the image pickup apparatus and a priority level of the schedule; a schedule execution unit that starts control of the image pickup apparatus based on the schedule; ***a comparison unit that compares, in a case where a request for remotely controlling the image pickup apparatus is received from one of the external devices when the image pickup apparatus is controlled based on the schedule, a priority level of the requesting external device with the priority level of the schedule including the set of control data used at the time when the request is received; a restriction unit that inhibits remote control of the image pickup apparatus by the requesting external device if the priority level of the schedule is higher than the priority level of the requesting external device as a comparison result; and a control unit that executes the remote control of the image pickup apparatus by the requesting external device if the priority level of the schedule is***

lower than the priority level of the requesting external device as a comparison result, which is neither taught or an obvious variation of the relevant prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
